1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Ito '017.

Ito teaches a motorcycle having the structure as claimed. The device includes front frame portions 57 joined to the cylinder portion at 63 and 64. The device further includes a rear frame 52 and a radiator 43. It is considered to be inherent that hangers 63/64 include bolts. These bolts are considered to project inwardly. Portions 57 are considered to be convex upward and rearward as broadly claimed, since they include a convex surface.
